

Ashlar-Vellum Channel Partner Newsletter

March 2014

New Success Stories

Two new success stories are being added to the website and will appear in this quarter's user newsletter, *The Design Explorer*.

[Slipper Satin & Ribbons](#) tells Michele Fremont's story of using Vellum® and Graphite™ for almost 20 years. Her new line of lights is inspired by the memory of her mother. "When I think of my mother I think of the era of 'slipper satin and ribbons.'"

[A New Way to Skin a Ski](#) is Walter Arnold's story of using 3D printing to prototype a new fastener called a "ski piercing" to secure climbing skins made by Switzerland's Montana International.

Reliable Container Moves to Rules

 **Reliable Container Corp.**

Reliable Container in southern California was the very first Ashlar Score! customer in 1991 for corrugated box design software. They are now moving to the latest version AlphaCorr Rules v8, the most logical migration path for former Ashlar Score! and Dimensional Impressions Score! users.

Welcome to Ashlar-Vellum

Anton Yourchenko has recently graduated from university in Kiev and joins our team doing Quality Assurance and Japanese/ Ukrainian/Russian/English translation. He facilitates communications between our programmers in Ukraine, our technical and sales associates in Japan, and our management in the US. Anton is a positive person who likes radio-controlled aircraft and music by Korean rapper Psy.

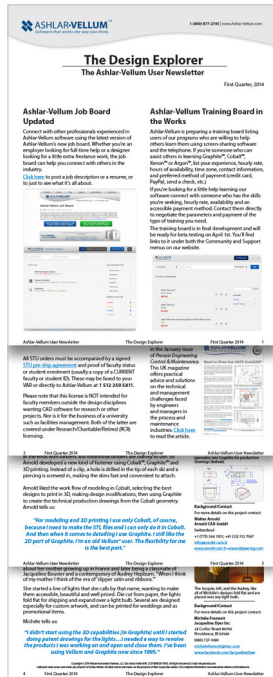

Roman Komaritsa is the newest developer on our Graphite team. He grew up in the small city of Kuzntesovsk in northwest Ukraine and went to university in Kiev. Roman has had several years of practical experience as a programmer for web-based and marketing applications. While gaining an orientation in our overall Graphite

package he's working on elements of our various box-making programs for AlphaCorr and Comnet.

Q1 Edition of *The Design Explorer*

The Q1 edition of *The Design Explorer* is going out this week to Ashlar-Vellum users. Included among the articles are:

- Ashlar-Vellum Job Board Updated
- Ashlar-Vellum Training Board in the Works
- More Affordable STU Pricing
- Call for 3D Printing Stories
- Graphite in *Process Engineering Control & Maintenance*
- A New Way to Skin a Ski
- Slipper Satin & Ribbons

Ashlar-Vellum Training Board in the Works

Ashlar-Vellum is preparing a training board listing users of our programs who are willing to help others learn them using screen-sharing software and the telephone. If you're someone who can assist others in learning GraphiteTM, CobaltTM, XenonTM or ArgonTM, list your experience, hourly rate, hours of availability, time zone, contact information, and preferred method of payment (credit card, PayPal, send a check, etc.)

If you're looking for a little help learning our software connect with someone who has the skills you're seeking, hourly rate, availability and an accessible payment method. Contact them directly to negotiate the parameters and payment of the type of training you need.

The training board is in final development and will be ready for beta testing on April 1st. You'll find links to it under both the Community and Support menus on our website.

Ashlar-Vellum Job Board Updated

Connect with other professionals experienced in Ashlar-Vellum software using the latest version of Ashlar-Vellum's new job board. Whether you're an employer looking for full-time help or a designer looking for a little extra freelance work, the job board can help you connect with others in the industry.

[Click here](#) to post a job description or a resume, or to just to see what it's all about.
