

COBALT™

Luc Heiligenstein designed this sports watch using both Ashlar-Vellum drafting and 3D modelling software.

"Ashlar-Vellum products bridge the gap between the artistic aspect and the engineering requirements with everything needed in between."

Cobalt™: The ultimate product design and development tool.™

Designer **Kevin Quigley** facilitates last minute revisions and client changes with ease using Cobalt for a new line of Victoria & Albert bathtubs.

with on-demand, dimensionally constrained and equation-driven parametrics that make creating variations on a design faster and easier than ever before.

The Vellum® magic is addictive—ask any Ashlar-Vellum customer why they use our products and you'll hear about "Vellumness." Across our product line, the unifying element is the magical feel of creative simplicity and efficient power. It anticipates your needs and quietly offers help without distraction or intrusion.

Cobalt matches professional power with speed and ease of use for flexible 3D modelling. Available for both Macintosh and Windows, Cobalt lets creative people work without worrying about their software. Designers save time and money by moving quickly from conception through completion in the real world of last minute changes. Primarily for designers, engineers and inventors, Cobalt leads the Ashlar-Vellum™ product line

Design to Manufacture

Product designer **Kevin Quigley** uses Cobalt's advanced features for concept design through precision manufacturing for both rapid prototyping and traditional construction methods.

"I always make sure that the parts are modelled with draft—which is easy to do in Cobalt—so that the basic form is manufacturable."

Kevin Quigley, Quigley Design.

Cobalt 3D Modelling

Speed designs from concept to profit with unmatched flexibility and power:

- On-demand parametrics facilitate design variations and product families.
- Full associativity and Design Explorer™ history tracking speed design revisions, updating models and drawing sheets.
- Class-A NURBS surfaces, ACIS solids and intuitive wireframe are in one seamless package.
- Non-modal interface lets you switch between modelling techniques and approaches on the fly.
- Classic Vellum 2D/3D product included.
- Professional drafting with true associative dimensioning and basic model analysis speeds manufacturing.
- More than 30 professional translators included FREE.

Explore any shape imaginable and Cobalt brings it to life.

Sketch in 2D and 3D—play with an idea, explore, discover. Only pencil and paper compete. Once you begin working with Vellum products, you'll understand the cult following.

Design any shape imaginable—even the organic forms essential to high-end design. Traditional CAD lacks the flexibility to create truly aesthetic, uniquely beautiful forms. Not so with Ashlar-Vellum products.

"I recently visited the Scaled Composites team in Mojave. They told me that they saved 33% of their engineering costs by using our software over that of our competitors."

Robert Bou President Ashlar-Vellum.

one concept. Unlike traditional enterprise-based CAD programs, Cobalt's parametrics are extremely easy to use and available on-demand.

Join the leaders—design innovators share a common tool: Cobalt. From renowned jewelry designers in New York and Paris to athletic equipment companies in the Pacific Northwest, from Apple Computer to Scaled Composites, Cobalt's flexibility frees creative people to focus on design.

Control the workflow—you can manage files even in the real world of multiple systems and users. Cobalt provides seamless data integration and accurate file sharing through our unparalleled set of translators, all included free.

Realize profits sooner—can you afford to wait? Cobalt streamlines the design process from start to finish, saving you time and money.

"Cobalt's ability to show me what a product and its component parts will look like (as well as exactly what their dimensions will be) helps me to completely visualize the product and 'turn it over in my hands.'"

Andy Marshall, guitar amplifier designer for THD Electronics was the innovator of these Yellow Jacket converters which allow different tubes to be used within the same amp.

"Using Cobalt has allowed me to translate my ideas into reality and to share my visions. Being able to model and photo-realistically render sculptural 3D shapes was very valuable in selling my ideas to others."

Mark Gajewski of G Squared designed the luxurious Haven leather arm chair for Inpako.
