

 **XENON™**

Designer Nelson Au won the Design-Engine International Photoreal Electronics Competition's Grand Prize for his Digi-Pix camera done in Ashlar-Vellum™ products. Read more about Nelson's success at www.Ashlar-Vellum.com/success.

Xenon™: 3D Power and finesse without constraints.™

Michael Golino of DesignJourney Industrial learned and completed a critically acclaimed furniture design within Xenon's 14-day demo period.

Xenon, like our flagship software, Cobalt™, offers supreme design flexibility and speed, without the high-end mechanical functions, like equation-driven parametrics and mechanical parts library. For both Macintosh and Windows, Xenon lets designers work freely without worrying about how to run their software. For those doing highly stylized concepts with a great degree of customization, Xenon offers the best of Cobalt's features at a more moderate price. In a world where highly customized, one-off products

rule, Xenon reigns supreme. Save time and money as you move from concept through completion.

The Vellum® magic is addictive—ask any Ashlar-Vellum customer why they use our products and you'll hear about "Vellumness." Across our product line, the unifying element is the magical feel of creative simplicity and efficient power. It anticipates your needs and quietly offers help without distraction or intrusion.

Optimally designed

Presented with a very tight technical brief, Kevin Quigley used Xenon's powerful associativity tools to work closely with Village Mill to create a signature mug optimized for molding.

"I like to work interactively with my customers. One of the ways we can do this is by using the powerful associativity in Ashlar-Vellum software."

Kevin Quigley designed the Optima Mug for Village Mill. Read more at www.Ashlar-Vellum.com/success.

Xenon 3D modeling

Speed designs from concept to profit with unmatched flexibility and power:

- Full associativity and Design Explorer™ history tracking accelerates design revisions, updating models and drawing sheets.
- Class-A NURBS surfaces, ACIS solids and intuitive wireframe are in one seamless package.
- Non-modal interface lets you switch between modeling techniques and approaches on the fly.
- Classic Vellum 2D/3D product included.
- Professional drafting with true associative dimensioning and basic model analysis speeds manufacturing.
- More than 30 professional translators included FREE.

Get the complete list of Xenon's exceptional features at www.Ashlar-Vellum.com/xenon.

Explore any shape imaginable and Xenon brings it to life.

Explore design ideas—conceptualize, experiment, even play, in 2D or 3D. Not even a pencil and cocktail napkin offer more freedom (Margaritas optional). Then work interactively with clients to painlessly refine designs. Powerful associativity and Design Explorer history tracking automatically ripple changes through the model and drawing sheets.

“Constructing the model in Ashlar-Vellum was easy because it replicated the process of making the model by hand. Solid modeling sped the development because the geometry was used in so many ways.”

Fred Puksta designed the award-winning Dynasty Collection for Saloom Furniture Company. Read more at www.Ashlar-Vellum.com/success.

Transfer files seamlessly—nothing matches the flexibility and sheer value of Ashlar-Vellum’s translation tools for 3D geometry. Even files from high-end, enterprise-based CAD programs can be imported and exported.

Sell your ideas successfully—the photo-realistic rendering in Xenon goes beyond visualization to reality. Get faster buy-in from you clients, then show manufacturing what you expect. Everyone involved sees exactly the results you envision. Your products not only go to market faster, but you are assured of greater success.

Discover other designers and the products they’ve created with Xenon at www.Ashlar-Vellum.com/success.

Imagine any shape—sensual curves, organic forms, and flowing edges are easily drawn in Ashlar-Vellum software, unlike traditional CAD programs. Set your own style, without limits.

Manufacture with confidence—Xenon’s precise 3D data guarantees accurate drawings, letting you export data for fabrication and send shop drawings to manufacturing.

Rise above the competition—leading design innovators share a common tool: Ashlar-Vellum products. From renowned jewelry designers in New York and Paris to athletic equipment companies in the Pacific Northwest, from Apple Computer to Scaled Composites, Xenon’s flexibility frees creative people to focus on design.

“In Ashlar-Vellum products there is no transition from 2D to 3D. Not having an engineering background, Cobalt definitely gives me a solid foundation to do the work I’m good at.”

Antonio Diaz is a successful sailboat designer in Narragansett, RI. Read more at www.Ashlar-Vellum.com/success.

“This major design revision would have been a serious problem, but Ashlar-Vellum’s history tracking allowed me to make the changes in only half an hour, and it updated 10 associated drawings automatically!”

Kevin Quigley created concepts for a new line of Victoria & Albert bathtubs in only a few hours. Read more at www.Ashlar-Vellum.com/success.
